IPSec VPN

Cisco IPsec VPNのご設定方法(iOS)

(1) 接続設定

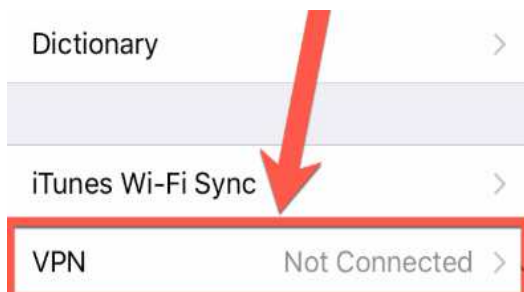

1-1. 設定をタップ

1-2. 一般をタップ

1-3. VPNをタップ

1-4. VPN構成を追加をタップ

1-5.VPNをタップ

The screenshot shows the Cisco VPN configuration interface. At the top, the Cisco logo is displayed. Below it, the 'タイプ' (Type) section has 'IPSec >' selected, highlighted with a red box and a blue arrow pointing to it from the text '重要!' (Important!). The '説明' (Description) field contains '※任意(何でも良い)' (Optional, anything is fine). The 'サーバ' (Server) field contains '※IPSec専用サーバーアドレスを入力' (Enter IPsec dedicated server address). The 'アカウント' (Account) field contains '※ユーザーIDを入力' (Enter user ID). The 'パスワード' (Password) field contains '※パスワードを入力' (Enter password). Below these fields is a toggle for '証明書を使用' (Use certificate), which is currently off. The 'グループ名' (Group name) field contains '「vpntech」と入力' (Enter 'vpntech'). The 'シークレット' (Secret) field contains '「proxin2010」と入力' (Enter 'proxin2010'). At the bottom, the 'プロキシ' (Proxy) section has three options: 'オフ' (Off), '手動' (Manual), and '自動' (Automatic), with 'オフ' selected.

1-6.VPNをONにする

The screenshot shows the iOS 'VPN' settings page. At the top, there is a back arrow and the text '一般' (General) and 'VPN'. Under the 'VPN構成' (VPN Configuration) section, the '状況' (Status) is '接続中' (Connected), and the toggle switch is turned on (green). Below this, there is a checkmark next to 'VPN' and the text '不明' (Unknown), with an information icon (i) to the right. At the bottom, there is a button labeled 'VPN構成を追加...' (Add VPN Configuration...).
